(54) Title: VIBRATION ATTENUATED POWER TOOL

(57) Abstract: A vibration attenuated power drill is disclosed. The drill comprises a housing incorporating a motor (6) for driving an output shaft. A drill bit is driven by the output shaft by means of cooperating ratchet plates contained in a gearbox. The motor has a stator (24) and a rotor (26), and is provided with vibration attenuating means comprising leaf springs (38) attenuating vibrations transmitted from the motor to the housing along the axis of rotation of the rotor (26) relative to the stator (24).
